

THE EVIDENCE INTELLIGENCE LAYER FOR INDUSTRIAL OPERATIONS

Industrial knowledge, ready when it matters.

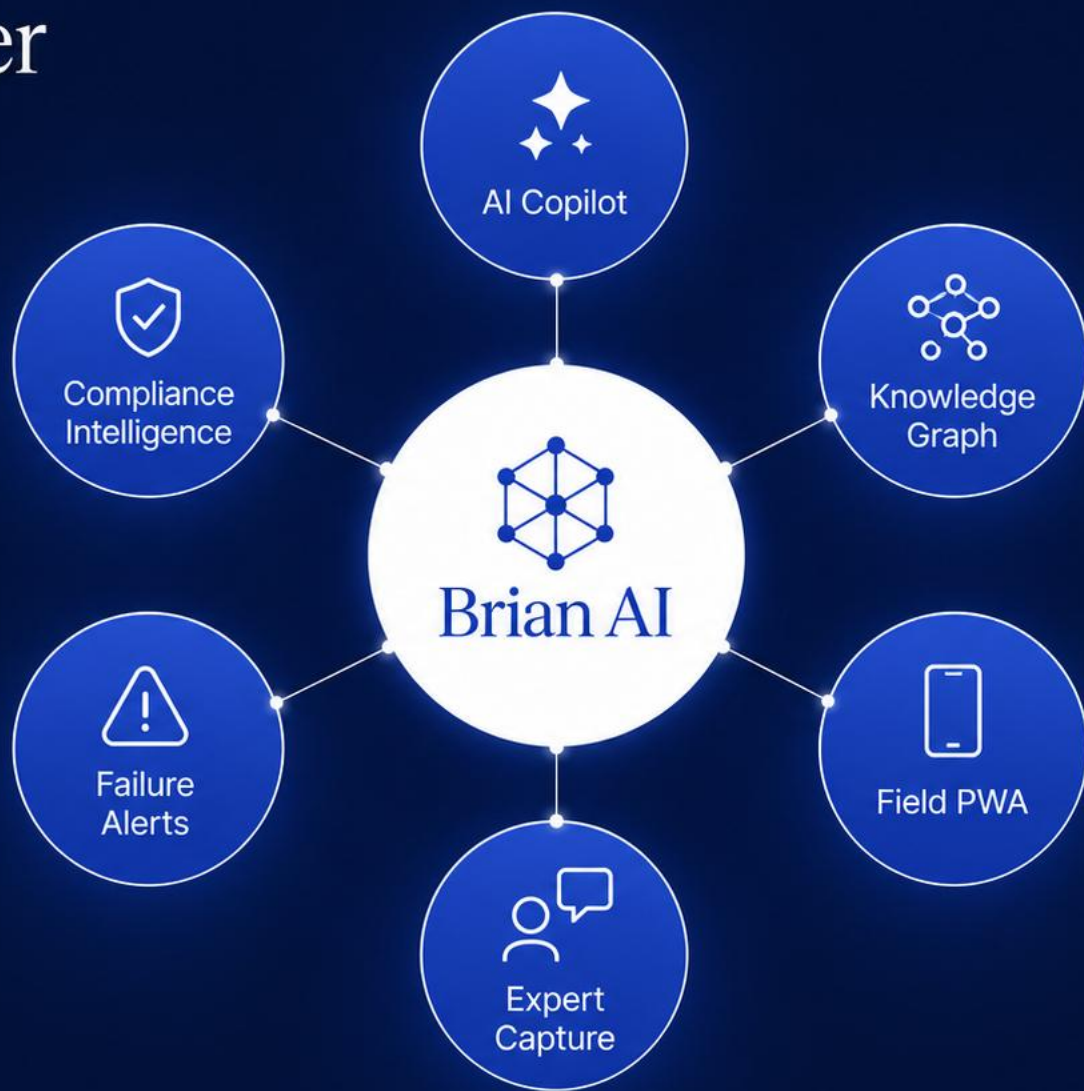

Brian AI

Critical plant knowledge is everywhere, except where it is needed.

Hours lost searching. Risks found *too late*.

One command center
for evidence-backed
industrial decisions.

Every answer traceable
to plant evidence.

Six capabilities. One connected knowledge system.

From searching for documents to acting on verified evidence.

01

AI Copilot

Answers with citations

02

Compliance

Clauses mapped to evidence

03

Knowledge Graph

Assets connected to context

04

Failure Alerts

Patterns surfaced early

05

Field PWA

OCR, voice, and offline access

06

Expert Capture

Experience made searchable

Industrial AI is finally possible, but trust determines adoption.

A working evidence-to-action system.

HACKATHON PROTOTYPE INDICATORS

3.5h

saved per evidence search

2

critical compliance
gaps surfaced

3

failure patterns
made actionable

20

documents unified

18

clauses evaluated

Prototype results on the
hackathon corpus. Not
production customer traction.

Grounded AI built for traceability.

Every answer retains a path
back to plant evidence.

EXPERIENCE

React 19 • TypeScript • Field PWA

APPLICATION

FastAPI • REST • streaming events

KNOWLEDGE

PDF extraction • entities • vector retrieval

INTELLIGENCE

Cited RAG • compliance • graph • alerts

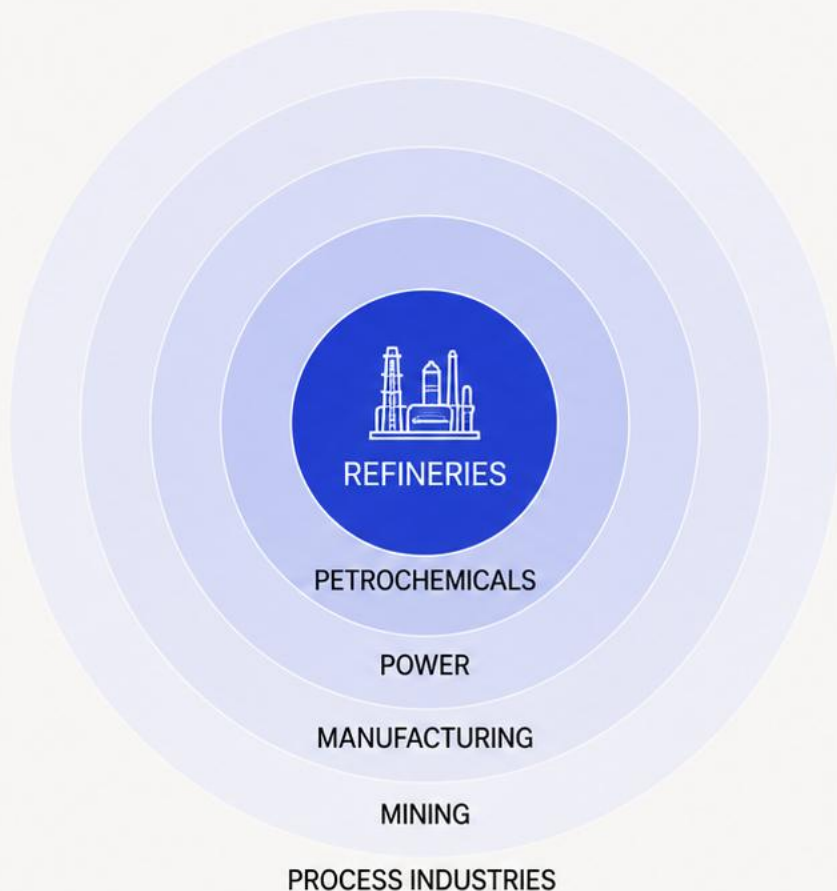

INFRASTRUCTURE

OpenRouter • Neo4j AuraDB • Vercel • Railway

Server-side credentials • protected writes • persistent index

Start with refinery knowledge. Expand across industrial operations.

Business model

Annual enterprise license
per plant

PILOT SUCCESS MEASURES

- Time to evidence
- Cited-answer accuracy
- Compliance gaps closed
- Repeat failures prevented

Builder at the intersection of AI, data, and business.
